PLUGGED IN

Good morning everyone, and welcome to the eight entry of *Plugged In*. This will be a short one due to us having only one meeting this week.

During the meeting on February 28th, the team received a \$1,000 grant from BayPort Credit Union. Afterwards, both mechanical and electrical teams made sure all equipment that the team needed for the competition on March 18th and 19th was in the tool chest and worked on finalizing the winch. The drive team reworked their strategy to fit under the guidelines of the updated game manual. The programming team refined the codes for the robot. The team assigned to build the cardboard pit robot were able to cut out the parts necessary to build the body and planned out how it will be painted.
